

Remote Backup

Our Remote Backup service will offer your school a cost effective and reliable service that removes the burden data backup from your school and provides you with a secure means for ensuring the ongoing **protection of your MIS data** (covers SIMS, Facility, MIS user's personal data and any other shared MIS data).

Based in the West Midlands, Invictus Technology has a proven track record of successfully delivering IT solutions across a broad range of industries throughout the UK. **In particular we have been working with schools in the West Midlands since 2005.**

The advantages of Remote Backup include:

- *No more involvement in changing tapes or DVDs by school staff – the **backup process is automated!***
- *No more costly ongoing investment in backup equipment such as tapes and tape drives.*
- *Critical data automatically protected and sent offsite, **fully secure and encrypted.***
- *The service is continually monitored.*
- *Data recovery is only a few mouse-clicks away.*

Our physical facilities are manned by live technicians 24 hours per day. **Biometric access controls** are employed at our locations, as well as video recording and strict entry/access logs. All data is housed on hardware RAID arrays providing at **least RAID -6 protection.** All power is conditioned and backed by battery banks which are backed by diesel generators. Physical machines are connected to at least two distinct power circuits. We employ network **Intrusion Detection Systems** as well as IDS on each individual host.
